

...and how we ensure creativity, quality and control

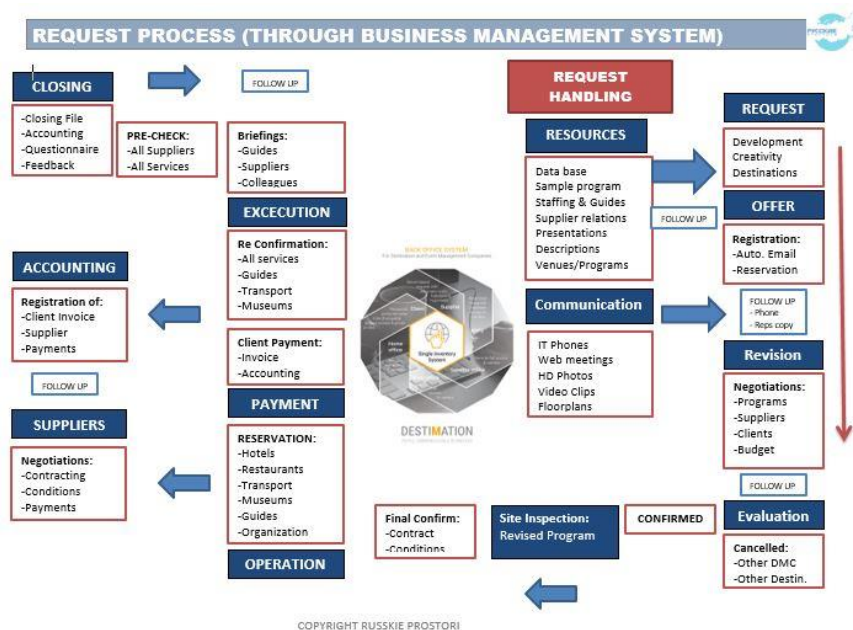

Project Development

With a huge database of descriptions, texts, photos, templates and rates (including supplier details from all over Russia) we change and tailor-make each specific request. This means that the initial offer can be provided quickly and linked to reservation and supplier details instantly!

The Actual Offer

We offer a variety of formats such as word, pdf, excel, web-links, etc. Our different layouts are sent with HD photos, scenarios, technical descriptions, grid format, itemized costs or power-point formats. All items are linked to actual websites as well as to map location of each to ensure additional facts and planning the logistics.

ON-LINE: By signing in on our website with a unique login and password you can alter the program on-line to find alternative items not offered. Options available are changing currency, move, add or delete items, change the groups size analyzing the effect of the total cost.

Alternatively, choose one "Sample Program" from our website to get an idea of creativity and costs (modified as of above) and submit through our system with your comments...

Internal work and administration

Our Business Management System means a secure, consistent single-inventory and database procedure. The information is stored and accessible for any team member, with control over reservations, costs, vouchers, invoicing and supplier deadlines.

This ensures our capability of utilizing different cost models, providing quick alterations and modifications as all items are linked to specific suppliers. By system monitoring of the time utilized for each specific project we can offer staff related cost as an alternative pricing model.

Operations

The system provides reports and information utilized securing a smooth operations such as; guide-, hostess- or staff instruction (with references and phone numbers to suppliers), operational schedules by time, specific pre-check information selected for various segments or suppliers. In huge operations specific transfer or arrival manifest can be generated as well as individualized registration of partial participation.

Final invoicing

As everything is recorder and updated continuously either directly or from remote locations during operation, the final billing can be provided and constantly monitored and reported.
